Measures You Can Trust

WEIGHTS AND MEASURES LABORATORY

A RICE LAKE WEIGHING SYSTEMS COMPANY

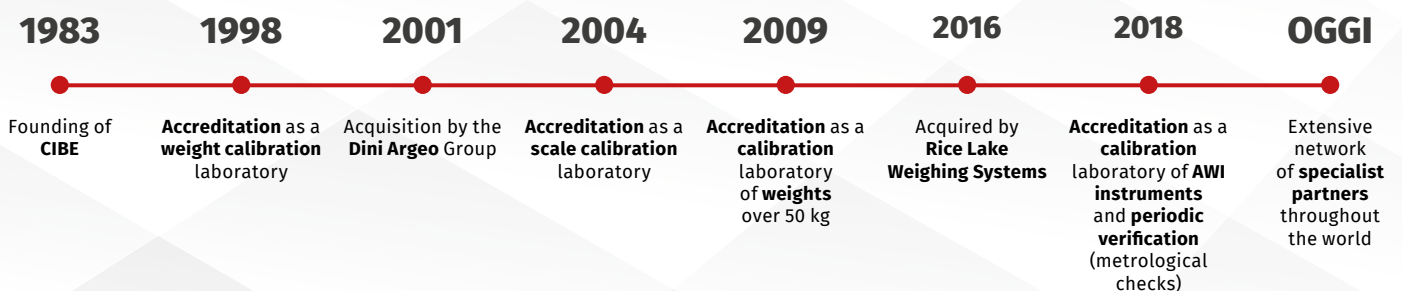

Your Partner in Metrology Since 1983

For over 40 years, the CIBE metrology laboratory has been a benchmark in Italy and Europe in the field of technical and legal metrology.

Thanks to its wide range of services and solutions, CIBE is able to meet the needs of all types of companies, such as:

- manufacturing companies
- chemical and pharmaceutical companies
- automotive companies
- environmental analysis, testing and calibration laboratories.

CIBE, an Italian laboratory based in Legnano (MI), is part of the international Rice Lake Weighing Systems Group and specialises in offering testing, calibration and periodic verification services for automatic and nonautomatic weighing instruments, as well as the sale of weights and weight sets.

The Metrology Laboratory

With a young, enterprising and highly qualified team, we offer expertise, proficiency and precision in all our services.

Our quality management system is certified in accordance with UNI EN ISO 9001:2015 for the marketing and calibration of weights, metrological consulting, and the verification and calibration of weighing and measuring instruments.

We are UNI CEI EN ISO/IEC 17025:2018 accredited as an LAT centre (Accredited Calibration Laboratory) for the calibration and periodic verification of weights, non-automatic weighing instruments (scales), checkweighing machines and gravimetric filling machines.

The accreditation is a testament to the laboratory's expertise, independence and impartiality, and confers value and reliability to the certificates issued on the market.

- Scales
- Weighing platforms
- Checkweighing machines
- Gravimetric filling machines

ACCREDIA CALIBRATION (LAT)

Established as an Accredited Calibration Laboratory (LAT) for weights, scales, checkweighing machines and gravimetric filling machines.

Any business that uses scales and weighing systems can rely on CIBE's services and products.

TEST REPORTS AND RECORDS

Metrological and electromagnetic compatibility tests for scales, electronic indicators and automatic weighing instruments (checkweighing machines, gravimetric filling machines and more).

METROLOGY CONSULTANCY AND TRAINING

Courses and webinars on the latest topics in technical and legal metrology, presented by real experts in the field.

Our Products

CIBE's wide range of products includes weights and weight sets from accuracy class M1 to class E1. A wide range of cases in a variety of materials (wood, aluminium, plastic) is available to store the weights for optimum protection, according to their intended use.
